JRE E5 series Shinkansen train

Provider Yaasan, Pacific 231

[Tweet](#)

This is the sound data of the E5 Shinkansen limited express train, which is active on the Tohoku Shinkansen and Hokkaido Shinkansen. As of 2020, it is a vehicle that has become mainstream.

Unlike the N700, it has a VVVF sound unique to JRE. In addition, this data also reproduces the noisy brake sound when stopping, which is unique to the E5 series.

※This data is **for the LokSound5 series only**. It is not supported before LokSound V4.

Initial address: 3 (short address)

Function assignment:

F1: Drive sound ON, interior light (AUX1) ON	F2: Police horn (electric bell)
F3: Indoor light AUX1	F4: shift mode Omission of the bell when the door is closed
F5: Emergency brake	F6: ATC bell (tentative)
F7: Volume adjustment	F8: Running sound in the tunnel
F9: In-car broadcasting · Utsunomiya Station	F10: Flange sound
F11: Door opening and closing, bell 1	F12: Door opening and closing, bell 2
